Scalability & Future Plan

Date	1 November 2026
Team ID	Mohammed Sukhawala
Project Name	Olympic Performance Analysis
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Small synthetic dataset (about 9,800 rows, 60 countries)	Results do not show real Olympic data	High
2	Flask site runs only on a local server	Others cannot open the site anytime	Medium
3	No real-time data or prediction models	Cannot forecast future medals	Low

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Runs locally; Tableau Public views open to all	Host the Flask app on a cloud service
2	Data Storage	CSV files under 1 MB	Move data to a database or cloud warehouse
3	Performance	Loads in seconds with 3 filters and 1 calculated field	Use Tableau extracts and pre-aggregated data
4	Security	Synthetic data only, no personal data	Add HTTPS and user login if private data is used

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact

Phase 2	Deploy the Flask website to a cloud host	Within 1-2 months	Public access at any time
Phase 3	Replace CSVs with real Olympic data in a database	Within 3-4 months	Accurate and up-to-date insights
Phase 4	Add medal prediction models and more Games	Within 6 months	Forecasts and wider analysis
